Pharmacy and Therapeutics Advisory Committee Recommendations

November 15, 2018

The following chart provides a summary of the recommendations that were made by the Pharmacy and Therapeutics (P&T) Advisory Committee at the **November 15, 2018** meeting.

Although the Committee met on November 15, 2018, the necessary quorum was not achieved; however, the expertise, vote and recommendations of the Committee members in attendance were captured and the Committee delivered the unofficial recommendations reflected below for review. Pending is the review by the Commissioner of the Department for Medicaid Services of the Cabinet for Health and Family Services of these recommendations and final decisions.

	Description of Recommendation	P & T Vote
1	<p><u>New Product to Market: Lucemyra™</u> Non-prefer in the PDL class: <i>Opiate Dependence Treatments</i> Length of Authorization: 5 days</p> <ul style="list-style-type: none"> Lucemyra™ (lofexidine) is a central alpha-2 adrenergic agonist indicated for mitigation of opioid withdrawal symptoms to facilitate abrupt opioid discontinuation in adults. <p>Criteria for Approval:</p> <ul style="list-style-type: none"> Medication is being used to mitigate opioid withdrawal symptoms and facilitate abrupt discontinuation of opioids; AND Patient is NOT pregnant or breastfeeding; AND Patient does NOT have a prolonged QT interval (> 450 msec for males, > 470 msec for females); AND If patient is currently taking methadone, prescriber attestation that a baseline electrocardiogram (ECG) has been performed; AND Patient has tried and failed, had a contraindication to, or experienced an adverse reaction/intolerance to buprenorphine OR methadone; AND Patient has tried and failed, had a contraindication to, or experienced an adverse reaction/intolerance to clonidine; AND Prescriber to provide verbal attestation of a comprehensive treatment plan between provider and patient; AND Prescriber to provide verbal attestation that the patient is capable of and instructed how to self-monitor for hypotension, orthostasis, bradycardia, and associated symptoms; AND Prescriber to provide verbal attestation that patient is NOT receiving prescribed concurrent opioid medication based on current medication list/orders, medical records, patient history and verified by KASPER query; AND 	<p>Passed 5 For 0 Against</p>

	Description of Recommendation	P & T Vote
	<ul style="list-style-type: none"> • Prescriber to provide verbal attestation that the patient has been provided with a tapering schedule and instructions on when to contact their healthcare provider for further guidance. <p>Age Limit: ≥ 18 years Quantity Limit: 48 tablets with 1 refill (96 tabs per treatment course; 1 course per year)</p>	
2	<p><u>New Product to Market: Tibsovo®</u> Prefer with clinical criteria in the PDL class: <i>Oncology, Oral – Hematologic Cancer (Oral Oncology, Hematologic Cancer)</i> Length of Authorization: 1 year</p> <ul style="list-style-type: none"> • Tibsovo (ivosidenib) is an isocitrate dehydrogenase-1 (IDH1) indicated for the treatment of adult patients with relapsed or refractory acute myeloid leukemia (AML) with a susceptible IDH1 mutation as detected by the Abbott RealTime™ IDH1 FDA-approved companion diagnostic. <p>Criteria for Approval:</p> <ul style="list-style-type: none"> • Diagnosis acute myeloid leukemia; AND • Documentation showing susceptible isocitrate dehydrogenase-1 (IDH1) mutation, as detected by an FDA-approved test; AND • Must be used as single agent; AND • Patient has relapsed or refractory disease; OR • Patient is not a candidate for intensive remission induction therapy; OR • Patient declines intensive therapy. <p>Renewal Criteria</p> <ul style="list-style-type: none"> • Patient continues to meet the above conditions; AND • Evidence of tumor response or lack of disease progression. <p>Age Limit: ≥ 18 years Quantity Limit: 2 tablets per day</p>	<p>Passed 5 For 0 Against</p>
3	<p><u>New Products to Market: Braftovi™</u> Prefer with clinical criteria in the PDL class: <i>Oncology, Oral – Skin (Oral Oncology, Skin Cancer)</i> Length of Authorization: 1 year</p> <ul style="list-style-type: none"> • Braftovi™ (encorafenib) is a kinase inhibitor indicated, in combination with binimetinib, for the treatment of patients with unresectable or metastatic melanoma with a BRAF V600E or V600K mutation, as detected by an FDA-approved test. <p>Criteria for Approval:</p> <ul style="list-style-type: none"> • Diagnosis of unresectable or metastatic melanoma with a BRAF V600E or V600K mutation, as detected by an FDA-approved test; AND • Used in combination with binimetinib. <p>Renewal Criteria:</p> <ul style="list-style-type: none"> • Meet initial approval criteria; AND • Evidence of tumor response or lack of disease progression. <p>Age Limit: ≥ 18 years Quantity Limit: 75 mg: 6 per day; 50 mg: 4 per day</p>	<p>Passed 5 For 0 Against</p>
4	<p><u>New Product to Market: Mektovi®</u> – Prefer with clinical criteria in the PDL class: <i>Oncology, Oral – Skin (Oral Oncology, Skin Cancer)</i> Length of Authorization: 1 year</p>	<p>Passed 5 For 0 Against</p>

	Description of Recommendation	P & T Vote
	<ul style="list-style-type: none"> Mektovi® (binimetinib) is a kinase inhibitor indicated, in combination with encorafenib, for the treatment of patients with unresectable or metastatic melanoma with a BRAF V600E or V600K mutation, as detected by an FDA-approved test. <p>Criteria for Approval:</p> <ul style="list-style-type: none"> Diagnosis of unresectable or metastatic melanoma with a BRAF V600E or V600K mutation, as detected by an FDA-approved test; AND Used in combination with encorafenib. <p>Renewal Criteria:</p> <ul style="list-style-type: none"> Meet initial approval criteria; AND Evidence of tumor response or lack of disease progression. <p>Age Limit: ≥ 18 years Quantity Limit: 6 per day</p>	
5	<p>New Product to Market: Doptelet® Non-prefer in the PDL class: <i>Thrombopoiesis Stimulating Agents</i> Length of Authorization: Date of Service; 1 fill per procedure</p> <ul style="list-style-type: none"> Doptelet® (avatrombopag), a thrombopoietin (TPO) receptor agonist, is indicated for the treatment of thrombocytopenia in adult patients with chronic liver disease (CLD) who are scheduled to undergo a procedure. <p>Criteria for Approval:</p> <ul style="list-style-type: none"> Diagnosis of chronic liver disease; AND Documentation of platelet count < 50 x 10⁹/L; AND Dosed per FDA-approved labeling (10 tablets per 5 days for platelets ≥ 40 x 10⁹/L or 15 tablets per 5 days for platelets < 40 x 10⁹/L); AND Confirmation of a scheduled invasive procedure occurring 5 to 8 days following the last dose of avatrombopag. <p>Age Limit: ≥18 years Quantity Limit: 15 tablets per fill</p>	<p>Passed 5 For 0 Against</p>
6	<p>New Product to Market: Mulpleta® Non-prefer in the PDL class: <i>Thrombopoiesis Stimulating Agents</i> Length of Authorization: Date of Service; 1 fill per procedure</p> <ul style="list-style-type: none"> Mulpleta® (lusutrombopag), a thrombopoietin (TPO) receptor agonist, is indicated for the treatment of thrombocytopenia in adult patients with chronic liver disease (CLD) who are scheduled to undergo a procedure. <p>Criteria for Approval:</p> <ul style="list-style-type: none"> Diagnosis of chronic liver disease (CLD); AND Documentation of platelet count < 50 x 10⁹/L; AND NOT have severe hepatic impairment (Child-Pugh class C), absence of hepatopetal blood flow, a prothrombotic condition other than CLD or a history of splenectomy, partial splenic embolization, or thrombosis; AND Confirmation of a scheduled invasive procedure occurring 2 to 8 days following the last dose of lusutrombopag. <p>Age Limit: ≥18 years Quantity Limit: 7 tablets per fill</p>	<p>Passed 5 For 0 Against</p>
7	<p>Criteria Review – Movement Disorders: Austedo® (deutetrabenazine) Austedo® (deutetrabenazine) is a vesicular monoamine transporter 2 (VMAT2) inhibitor approved for the treatment of chorea associated with Huntington’s</p>	<p>Passed 5 For</p>

	Description of Recommendation	P & T Vote
	<p>disease and the treatment of tardive dyskinesia.</p> <p><u>Current criteria:</u> Trial and failure of a preferred agent.</p> <p><u>Recommended criteria:</u> Length of Authorization: 1 year Criteria for Approval:</p> <ul style="list-style-type: none"> • Patient is not concurrently using monoamine oxidase (MAO) inhibitors (e.g., isocarboxazid, phenelzine, rasagiline, safinamide, selegiline, tranylcypromine, etc within 14 days) OR reserpine (within 20 days) OR another VMAT2 inhibitor (e.g., tetrabenazine, valbenazine); AND • Patient is not pregnant; AND • Patient does not have hepatic impairment (e.g., Child-Pugh A-C); AND • Patient meets the following criteria for either Huntington’s chorea <i>or</i> tardive dyskinesia: <p><i>Huntington’s Chorea</i></p> <ul style="list-style-type: none"> • Patient is diagnosed with chorea related to Huntington’s disease; AND • Trial and failure of 1 preferred product (e.g., tetrabenazine); AND • Patient is able to swallow; AND • Patient does not have the following conditions: <ul style="list-style-type: none"> ○ History of, or current, untreated or inadequately treated depression; OR ○ Suicidal ideation. <p><i>Tardive Dyskinesia</i></p> <ul style="list-style-type: none"> • Diagnosis of tardive dyskinesia; AND • Patient is able to swallow; AND • Documentation that AIMS test has been completed (e.g., score or copy of AIMS assessment); AND • Prescribed by or in consultation with a neurologist or psychiatrist (or other mental health provider), provided patient has reasonable access; AND • Documentation or claims history of current or former chronic patient use of a dopamine antagonist (e.g., antipsychotic, metoclopramide, prochlorperazine, droperidol, promethazine, etc.). <p>Renewal Criteria:</p> <ul style="list-style-type: none"> • Patient continues to meet criteria defined for initial approval; AND • Documentation of improvement in symptoms associated with respective condition (e.g., tardive dyskinesia or Huntington’s chorea). <p>Age Limit: ≥ 18 years Quantity Limit: 4 per day</p>	0 Against
8	<p>Criteria Review – Movement Disorders: Ingrezza™ (valbenazine) Ingrezza™ (valbenazine) is a vesicular monoamine transporter 2 (VMAT2) inhibitor indicated for the treatment of adults with tardive dyskinesia (TD). Tardive dyskinesia is a side effect that can be seen in patients on long treatments of antipsychotic medications and medications used for gastrointestinal disease.</p>	Passed 5 For 0 Against

	Description of Recommendation	P & T Vote
	<p><u>Current criteria:</u> Trial and failure of a preferred agent.</p> <p><u>Recommended criteria:</u> Length of Authorization: 1 year Criteria for Approval:</p> <ul style="list-style-type: none"> • Diagnosis of tardive dyskinesia; AND • Documentation that AIMS test has been completed (e.g., score or copy of AIMS assessment); AND • Prescribed by or in consultation with a neurologist or psychiatrist (or other mental health provider), provided patient has reasonable access; AND • Documentation or claims history of current or former chronic use of a dopamine antagonist (e.g., antipsychotic, metoclopramide, prochlorperazine, droperidol, promethazine, etc.); AND • NO concurrent use of MAO inhibitors (e.g., isocarboxazid, phenelzine, rasagiline, safinamide, selegiline, tranylcypromine, etc.) or strong CYP3A4 inducers (e.g., carbamazepine, phenytoin, phenobarbital, rifampin and related agents, St. John's wort, etc.). <p>Renewal Criteria:</p> <ul style="list-style-type: none"> • Patient continues to meet criteria defined for initial approval; AND • Attestation or documentation of improvement in TD symptoms. <p>Age Limit: ≥ 18 years Quantity Limit: 1 per day</p>	
9	<p>Topical Acne Agents</p> <ul style="list-style-type: none"> • DMS to select preferred agent(s) based on economic evaluation; however, at least 5 products unique chemical entities or combinations should be preferred. • Agents not selected as preferred will be considered non-preferred and require PA. • For any new chemical entity in the <i>Topical Acne Agents</i> class, require PA until reviewed by the P&T Advisory Committee. 	<p>Passed 5 For 0 Against</p>
10	<p>Anticholinergics/ Antispasmodics</p> <ul style="list-style-type: none"> • DMS to select preferred agent(s) based on economic evaluation; however, at least 4 unique chemical entities should be preferred. • Agents not selected as preferred will be considered non-preferred and will require PA. • For any new chemical entity in the <i>Anticholinergics/Antispasmodics</i> class, require PA until reviewed by the P&T Advisory Committee. 	<p>Passed 5 For 0 Against</p>
